

## Neurosciences and the Human Person: New Perspectives on Human Activities

Proceedings of the Working Group 8-10 November 2012

A. Battro, S. Dehaene and W. Singer (eds)

*Scripta Varia* 121

Vatican City, 2013

pp. 320

ISBN 978-88-7761-106-2

### 1. Origins of Mind

**Hominid Evolution and the Emergence of the Genus *Homo*** (PDF)

Yves Coppens

**Human Origins from a Genomic Perspective** (PDF)

Svante Pääbo

**Mind and Soul? Two Notions in the Light of Contemporary Philosophy** (PDF)

Enrico Berti

### 2. The Dynamic Brain and Consciousness

**The Neuronal Correlate of Consciousness: Unity in Time Rather than Space** (PDF)

Wolf J. Singer

**Brain Rhythms for Cognition and Consciousness** (PDF)

Earl K. Miller

**The Brain Mechanisms of Conscious Access and Introspection** (PDF)

Stanislas Dehaene

**Consciousness and Self-Consciousness In Favour of a Pragmatic Dualism in the Philosophy of Mind** (PDF)

Jürgen Mittelstraß

**Neuroscience of Self-Consciousness and Subjectivity** (PDF)

Olaf Blanke

### 3. Towards a neuroscientific understanding of free will

**Neural Mechanisms Underlying Human Choice in the Frontal Cortex (PDF)**

Timothy E. Behrens

**False Perceptions & False Beliefs: Understanding Schizophrenia (PDF)**

Christopher D. Frith

**Addiction: A Disease of Self-Control (PDF)**

Nora D. Volkow

**Understanding Layers: From Neuroscience to Human Responsibility (PDF)**

Michael S. Gazzaniga

**Self-Knowledge and the Adaptive Unconscious (PDF)**

Timothy D. Wilson

**Seven Ways Neuroscience Aids Law (PDF)**

Owen D. Jones

**Interaction Between Two Readings: The Naturalistic and the Socratic “Know Thyself” (PDF)**

Marcelo Sánchez Sorondo

**4. Sources of human comprehension and incomprehension**

**Are There Innate Mechanisms that Make us Social Beings? (PDF)**

Uta Frith

**Natural Cooperation (PDF)**

Martin A. Nowak

**Spiritualité de l'âme (PDF)**

Georges Card. Cottier

**Developmental Sources of Social Divisions (PDF)**

Elizabeth S. Spelke

**5. Can neuroscience improve the brain and mind?**

**The Birth of the Mind (PDF)**

Jacques Mehler

**How Genes and Experience Shape the Human Will (PDF)**

Michael I. Posner

**New Interfaces for the Brain (PDF)**

John P. Donoghue

**Circuits for Action Diversification**

Silvia Arber

***Homo Docens* and the Teaching Brain** (PDF)

Antonio M. Battro

**Final Statement** (guided by Stanislas Dehaene)
